

TEEN WOLF TOKEN

WHITEPAPER

THE NEXT GENERATION FINANCE

TEENWOLF TOKEN

Welcome to **Teenwolf token**, a simple, highly intelligent community-driven platform enhancing economic well-being by empowering young people and diverse cultures by giving them control over their finance and exploring different possibilities to amass wealth.

The **\$TEENWOLF token** is built on the binance smart chain(Bep20) with a smart code that enables the adoption of the token by young adults and the community effortlessly without being rejected, based on high demand fee.

OUR MISSION

For over a decade, cryptocurrency has been a major player in the wealth advent system. Our primary goal is to advance youth expertise in the crypto space and initiate the adoption of a digital currency in order to equip and prepare them for the evolution of technology in the financial world. This institutes the evolution of technology in the financial world. This institutes the reorganization of our society and redistribution of wealth, giving every person a fair chance to attain financial independence and freedom.

There is a great need to have to have a breed of traders who are part of the global decentralised finance as this is the platform they require to overcome technological hurdles and truly recognize how money works. This is where TEENWOLF token comes in, supplying tools and content materials that provides comfortability with money to the younger generation while they learn and invest, subsequently opening exceptional possibilities to create and amass wealth.

OUR ECOSYSTEM THE \$TEENWOLF TOKEN

TEENWOLF token is launched on the Binance Smart Chain (BEP-20) network. It is a medium for transactions, being a monetary system on its own, it solves problems in the community with a smart code that rewards loyal holders, with a 5% burn every quarter.

RFI STATIC REWARDS

4% of each transaction with \$TEENWOLF token is deducted and redistributed to our pool of holders. By simply holding, you will be exposed to a broad variety of tokens increasing progressively each day as the community transacts.

AUTOMATIC LP

A small fraction of each trade is diverted to auto-generating liquidity that goes into collective pools utilized by exchange.

POTENTIAL COMPLICATIONS

Over the years, the younger generation has inherited an impaired world with multiple crisis such as:

- Security and well being
- Inadequate Financial education
- Unemployment
- Malnourishment and hunger
- Inaccessibility to product and technology
- Inadequate expertise in data analysis and research

- Lesser industrial adaption
- Inadequate societal and healthcare system
- Unsatisfied talent adoption

PROPOSED SOLUTIONS

- **EDUCATION:** Lack of true education is a deterrent to actualization of dreams and maximization of talent among the teenage community. TEENWOLF solves this problem by creating social educational programs which can be incorporated into schooling activities, universities or jobs, thereby providing a financial knowledge system to our community and beyond.
- **UNEMPLOYMENT:** Unemployment proliferates the rate of poverty and subsequently diminishes the standard of living. TEENWOLF encourages a labour intensive technology in lieu of a capital intensive technology. With the decentralization of industrial activities, a self-employment scheme is created, which enables young people to attain financial independence through blockchain technology.
- **PRODUCTS AND TECHNOLOGY:** TEENWOLF smart contract for cryptocurrency agnostic blockchain like media, integrating robotic function via the blockchain for multitasking, creating a wall-to-wall, inexpensive and easy mobile payment system, fully integrated business application tools and an independent and reliable(news and information publishing) organization.
- **RESEARCH DATA AND INFORMATION:** TEENWOLF offers ways to organize research in general to create unbiased data and a catalog of tasks which can be completed by AI to inspire newbie developers. It also created algorithms that focus on environmental dependency on new technologies and identifies new ways that help some countries get off the data protection hysteria.
It provides new suggestions for data privacy models that empower the individuals, and tools and platforms for interaction with government and communities.
Finally, it strengthens cybersecurity to forestall attacks by hackers.
- **INDUSTRY:** TEENWOLF will introduce a more effective technology for efficient customer experience management. Development and installment of a new system that can track and assess the rate of innovative developments and create a fortune 100,000 leader board with indexes addressing environmental situations and how to solve them using blockchain.

This also applies to employees and other key aspects. This also designs new systems for interaction with corporation and create a system that eliminates wait(in line, at a doctor's, in a bus stop).

TEENWOLF UTILITY

Teenwolf crypto bank is an independent platform that allows teenagers and other members of the crypto community to carry out transactions and perform other activities on the blockchain. It helps the community members to manage digital currencies and attaches a payment function in liaison with financial service providers to connect the blockchain ecosystem with daily life. This is actualized through the following;

- **CEX:** Centralised exchanges have been generally and widely accepted as a platform for trading cryptocurrency safely, since their inception in 2010. By acting as a middleman, they facilitate cryptocurrency transactions. Teen CEX is a centralized exchange that provides an opportunity for teenagers to learn, invest and trade cryptocurrency effectively. By carrying out transactions on their own, they become more knowledgeable about the tech-oriented financial world and thus, are put on a fast lane to attaining financial freedom.
- **BUILD:** The **TEENWOLF token** is not just a regular token for passive holding. It doesn't end with just accumulating or trading the token. The teen crypto bank contains a section provided by **TEENWOLF** which allows teenagers and other users to build and develop crypto related projects such as NFTs on our blockchain system. It also enables them to engage in other activities on the Blockchain which could improve the ecosystem in which people have invested in. The good thing is, you don't need to be highly tech savvy or be an expert in programming, the BUILDing activities could be playing blockchain games, writing educational articles, beta testing products etc.

• NGO COMMUNITY INTEGRATION

TEENWOLF is a community-oriented project. This means that it seeks ways to improve the lives of and provide quality services to the community at large. This will be done through the following;

- **FUND RAISING:** **TEENWOLF NGO** provides a platform that enables start-up companies to raise funds to execute their projects. By setting up a stage for these newbie companies to pitch their decks and attract investors who will directly invest in their projects, **TEENWOLF** is out to get every start-up company on the road to become a thriving organization. We solve the problem of helping start-up companies get investors who invest in their projects for one year and get a ROI afterwards. This way, it's a win-win situation for both parties.

PROJECT MANAGEMENT: Cryptocurrency has gone beyond merely trading. The blockchain market is estimated around \$2.3B this year. TEENWOLF has experts in blockchain technology who you can easily make payment to via the Teenwolf token and you get your project handled effectively. Some projects such as :Peer-to-peer ride-sharing, exact shipment location data and fake product identification are a few of the projects which can be managed through blockchain. By simply installing the information or data of your project into the blockchain, the project is executed.

TEENWOLF PARK

Teenwolf park is an interactive avenue where community members can display their crypto skills and products such as digital arts(NFTs) in form of music, photos, drawings etc for auctioning. In addition to that, fun activities such as gaming also take place in the park. **Teenwolf park** basically exposes the users to metaverse experience.

- **SIMPLIFIED PAYMENT SYSTEM:** The **TEENWOLF token** is a simplified means of payment for transactions in the **teenwolf park** and other platforms. With low charge fees and a non-tedious and swift transaction interface, **teenwolf** eliminates rigor in carrying out transactions. This is because the processes involved in having a successful transaction are overly simplified, a no-brainer for users.
- **GAMING:** The global gaming market is worth \$180B at present- the form of entertainment with the highest and fastest rate of growth. This can be attributed to the rise and popularity of technology. With the integration of metaverse in TEENWOLF blockchain, users can play games on the blockchain. The players can earn tokens by playing and competing, and the earned tokens can be exchanged for other crypto assets or fiat.
- **NFT/AMUSEMENT:** NFTs can be designed on the blockchain on which **TEENWOLF** is built. Digital arts such as music, drawings, paintings are displayed in the Teenwolf park where they can be traded and payment is immediately made with the Teenwolf token.
